

**Confidence
beyond the BISSC[®]
Certification**

When you select one of Boston Gear or Warner Electric's BISSC certified speed reducers, motors, and clutches, you are selecting more than just a piece of power transmission equipment with white paint and a blue sticker. You are selecting the brands trusted by the bakery and snack food industry for generations, thanks to performance designed especially for the baking and snack food industry. Shift after shift, year after year, our BISSC certified products will withstand the dust, temperature, humidity and washdown extremes you throw at them. So if your current power transmission solution has a BISSC sticker—but not BISSC performance—switch to the brands that are designed for your production environment: Boston Gear and Warner Electric.

Product Solutions for
**The Bakery
and Snack Food
Industry**

Bakery & Snack Food

BISSC Certified Solutions

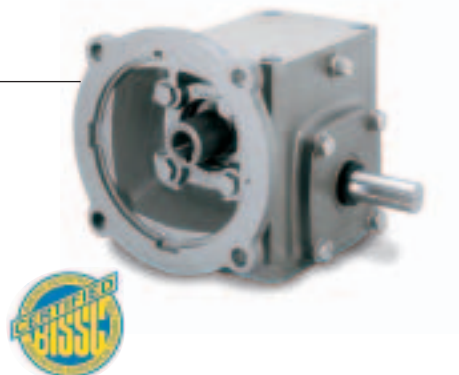

White Bost-Kleen™ (BK)

- Designed for use in bakeries and other dusty, humid, and hot environments
- Treatment utilizes a 2-step USDA-approved non-toxic epoxy coating
- Durable, washable, and non-absorbent
- Available on all Boston Gear speed reducers, including the new 700 Series with PosiVent™ option for bakery applications

Stainless Bost-Kleen™ (SBK)

- Designed for use in environments with use of caustic washdown solutions or aggressive seasonings such as salt or hot spices
- Treatment utilizes a 3-step process that includes durable USDA-approved epoxy embedded with stainless steel pigments
- Durable, washable, and non-absorbent
- Available on all Boston Gear speed reducers, including the new 700 Series with PosiVent™ option for bakery applications

Enclosed UniModule Clutch/Brake (EUM-W)

- Designed for use in dusty, humid applications. Totally enclosed to keep wear particles in and contaminants out
- Units come standard with stainless steel shafts, USDA approved coating, corrosion-resistant fasteners, and are available with optional conduit boxes and integral controls
- Offers significant cost-of-ownership and repeatability advantages over air-driven clutches
- Available in a wide range of sizes
- All units are BISSC certified standard

AC and DC Motors

- AC Motors available from 0.5 to 5 hp
- DC Motors available from 1/4 to 3/4 hp
